REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The Applicant claims a fuel cell comprising a plurality of unit cells each having a solid electrolyte membrane, which are electrically connected to each other by at least one electrically conductive member, wherein a low ion conductive region of the solid electrolyte membrane is located between the unit cells, and the electrically conductive member is formed in a region other than the low ion conductive region.

The prior art of record, Maeda et al., U.S. Pat. Application Pub. 2004/0086762 A1, teach a fuel cell comprising a plurality of unit cells electrically connected to each other and an electrically conductive member extending through the membrane. It teaches a region of membrane having a groove or recesses formed on it, wherein the groove or recess is filled with insulating resin.

However, the prior art of record, taken either alone or in combination, fails to disclose or render obvious a low ion conductive region of the solid electrolyte membrane located between the unit cells wherein the electrically conductive member is formed in a region other than the low ion conductive region.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Angela J. Martin whose telephone number is 571-272-1288. The examiner can normally be reached on Monday-Friday from 9:00 am to 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick Ryan can be reached on 571-272-1292. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
